

**INSTRUCTIONS**

1. Original and/or subsequent record used to evaluate the corner position.
2. Description of evidence found, note discrepancies in the record, state method of establishing lost or obliterated corners.
3. Description of monument and accessories set to perpetuate the corner position.
4. Sketch of corner, show all pertinent data which can best be shown in a sketch example, corner marking, topography ties, position of accessories, etc.
5. Certification must be signed and sealed by Land Surveyor registered in the State of Montana.
6. Fill in Cross Index & Section Diagram at bottom of sheet.

**CERTIFIED CORNER RECORDATION**

Corner 13, 14, 23, 24 T. 4S R. 8E P.M.M. Park County

- 1) Original GLO survey of 1874 by T. Benton Post: Set a basalt stone 17x6x5", 12" in the ground for cor. to sec.13,14,23,24, marked with 3 notches on the S. and 1 on the E. edges.
- 2) Found no evidence of the original corner monument. I did find an aluminum cap in a mound of stones as described and set according to the recordation filed by Dennis Foreman in 1993. After finding the original bearing tree for the section corner 1 mile to the west; and finding the original stone 1 mile to the north, I do not accept the corner position indicated by Foreman's cap. I instead use a four way proportion using the 2 above mentioned corners, and the section corners used by Foreman to the east and south.
- 3) I did not monument this corner. The aluminum cap set by Foreman serves as a reference monument. It bears S 63° 33' 44" E, 46.33 ft.

( See reverse side for corner ties )

**SKETCH OF CORNER**

CERTIFICATION

I, Joel E. Ellefson  
certify the information shown herein is true and correct.

Joel E. Ellefson  
Signature Ground Party Chief

I, Donathon D. Palmer  
certify that this Corner Record correctly represents work performed by me or under my direction in compliance with the "Corner Recordation Act", (MCA) 82-22-101, et seq., M.C.A.
