Found: Original sandstone, 17x14x6, lying flat. Monument appears in original position and fell west. Therefore I reset in place with 'CC' on east face with 6 grooves, 'SC' on north face with 6 notches and 6 notches in south edge. Found scattered mound of stone along east side of monument (as called for in notes). Monument is situated at intersection of a dilapidated fence extending north and a dilapidated fence extending east. I re-raised a mound of stone east of corner.
