

MILK HEADWATERS

Watershed

National Hydrography Dataset

-  County Border
-  Highway
-  Public Land Survey System Townships
-  Fourth Code Watersheds
-  LAKE/POND
-  SWAMP/MARSH
-  Intermittent Stream
-  Perennial Stream, River
-  Artificial Centerline

Purpose: Provide support for surface water analysis and display. Not all items in legend will always appear on the map.
 SOURCE: United States Geological Survey, NHD for Montana
 The National Hydrography Dataset (NHD) is a comprehensive set of digital spatial data that contains information about surface water features such as lakes, ponds, streams, rivers, springs and wells.

This map is to be used as a primary reference source and is not intended for use in site - specific planning. This is public information and may be interpreted by organizations, agencies, units of government, or others, based on needs; however, they are responsible for the appropriate application. Federal, State, or local regulatory bodies are not to reassign to the Natural Resource Information System any authority for the decisions they make.
